Bed Bug Treatment Prep

Before a bed bug service it is necessary that the following conditions be met.

1. Document the places where the bed bugs have been seen.
2. Remove clutter from the floors in the entire home.
3. Remove and clean all bed linen. Be sure to dry these items on the high settings bed bugs do not handle prolonged exposure to high temperatures.
4. Vacuum floors and use the crack and crevice tool along the edges of the baseboards where the carpet meets the baseboard.
